🐙 github.com/Prasadj18 📍 Bengaluru, India

Professional Summary

Final year Information Science student building full-stack and blockchain applications with React.js, Node.js, MongoDB, and Solidity — including a real-time messaging platform and a blockchain-based pharmaceutical supply chain system. Strong grounding in DSA, OOP, DBMS, and Computer Networks. Looking for a Software Engineering role where I can ship production-quality code and keep learning fast.

Education

BMS College of Engineering, Bengaluru <i>B.E. in Information Science and Engineering</i>	Sep 2024 – Jul 2027 CGPA: 8.0 / 10
Government Polytechnic College, Lingasuguru <i>Diploma in Computer Science and Engineering</i>	Jul 2021 – Jun 2024 CGPA: 8.76 / 10

Projects

Real-Time Chat Application <i>React.js, Node.js, Express.js, Socket.IO, MongoDB, Mongoose, Tailwind CSS</i>	July 2025 – sept 2025
- Built a full-stack real-time chat application using React.js, Node.js, Express.js, MongoDB, and Socket.IO, enabling instant one-to-one messaging and live user presence. - Implemented real-time bidirectional communication using Socket.IO and persistent message storage with MongoDB and Mongoose, along with REST APIs for core application operations. - Developed JWT-based user authentication and integrated Cloudinary for file sharing, with responsive UI, user status indicators, and theme customization using React and Tailwind CSS.	
Pharmaceutical Supply Chain Management System <i>React.js, Solidity, Ethereum, Hardhat, Ethers.js, MetaMask</i>	mar 2026 – aug 2026
- Developed a blockchain-based pharmaceutical supply chain system for transparent batch tracking, ownership traceability, and role-based access control across supply-chain stakeholders. - Implemented Solidity smart contracts for pharmaceutical batch registration, ownership transfers, lifecycle-status updates, expiry validation, and timestamped ownership history. - Built a React.js frontend with Ethers.js and MetaMask integration, enabling authorized users to interact with blockchain functions for registering, tracking, and transferring pharmaceutical batches.	

Technical Skills

Languages:	C++, Python
Web Development:	HTML, CSS, React.js, Nodejs, REST APIs
Databases:	MongoDB, MySQL
Core CS:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Tools & OS:	GitHub, VS Code, Windows 10/11, Ubuntu
Blockchain:	Solidity, Ethereum, Hardhat, Smart Contracts

Certifications

- Deloitte Technology Job Simulation – Forage, July 2026
- AI Fundamentals: Foundations for Understanding AI – IBM SkillsBuild
- Full Stack Development – Board Infinity
- Git & Version Control – Infosys Springboard

Extracurricular

- First Prize – Chess Competition, Government Polytechnic College, Lingasuguru
